THE PERFECT MATCH
AT THE PUSH OF A BUTTON.

The spectrophotometer is a quick and precise tool for an exact colour match. The tool measures a colour and links it to our extensive CRS database. This time-saving colour tool has different languages and is easy to calibrate. Our colour experts conduct ongoing research and add information to the database every day. Weekly updates ensure that the latest information is always at your fingertips.

5 angle spectrophotometer

ARTICLE NUMBER	DESCRIPTION
66-365*	**Spectrophotometer**
64-002	**Coarseness selector**
66-366	**Spectrometer base station**
	Plastic case with a transparent cover that can be opened and closed to protext from falling, dust or dirt. With access for the cable to connect the spectro to PC.

* Coarseness Selector included

The Coarseness Selector
A fan deck containing six coarseness examples to help identify the right degree of coarseness required for effect and metallic colours.

Touch screen
Working with this unit is far more intuitive thanks to the inclusion of a touch screen and stylus, like those available on leading smartphones.

Easy to use
For optimum performance, the spectrophotometer should be calibrated regularly. Calibration is intuitive and uses a traffic light colour system to show the calibration status.

REVOLUTIONISE
YOUR PAINT JOB.

The new RotoGen 1000 paint mixer revolutionises your paint job, by completely removing the need for manual stirring. Specifically designed for efficient and fast homogenisation of car refinish paint, the machine rotates in synchronisation to produce the perfect mix of materials. It optimises the mixing process guaranteeing a flawless result, even with small volumes.

66-450	The Collomix Subframe has the function of a sort of table on which the paint mixer Rotogen (66-400EU and 66-400EXEU) can be placed for best stability during mixing. (LxWxH 46x46x76 cm)

PRO‑SPRAY

MODULAR
FUNCTIONALITY.

The Global Color Box is a modular system, that enables the user to modify the design as needed, accommodates fan decks and can be mounted on a wall or on a tabletop. It features 12 rows, each row including 9 decks (a total of 103 decks and 4735 colour chips). It also comes with 5 empty decks to accommodate new Valspar brand colour systems. The modular design allows you to build additional rows at any time.
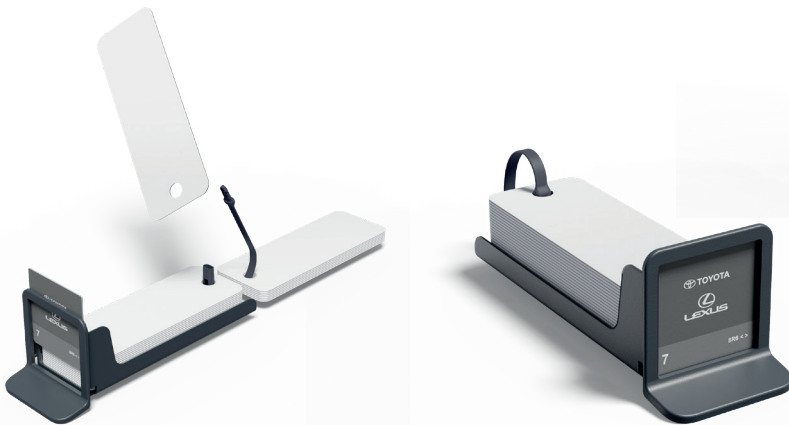

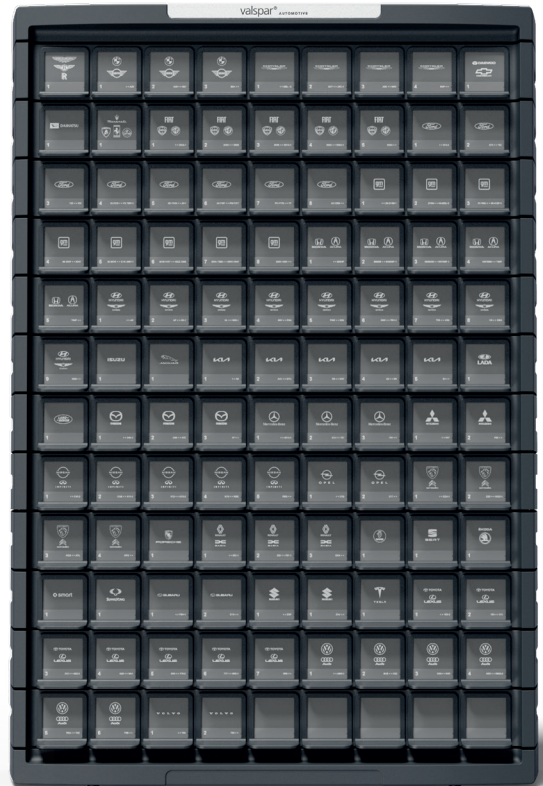

Global color box

ARTICLE NUMBER	DESCRIPTION
VR61200Sxx	**Global color box**
61200Uxx	**Updates**
	(xx refers to version number)

Features
- Protected colour chips
- Qualitative card (no sticker to avoid problems with stickers that come off)
- Easy to take a single required color chip out and put it back into the right position. (This is important for using the Color box in combination with the Colorator.)
- Functional grip
- Secure fit, but easily exchangeable for product updates

Benefits
- Easier to find the right colour, remove it from the fan deck and return it to its rightful position
- Freestanding or can be mounted to a wall (without the use of brackets or any extra parts)
- Easy to mount on the wall with the Wall mount instruction and included screws and spacer
- Protective with a closed top, sides and back (colour chips won't get dusty, dirty)
- Sustainable, made with 15% less plastic than the previous version
- Very sleek in look and design

PROFESSIONAL INSTRUMENT
FOR THE BEST RESULTS

Mixing colors for your projects must be done very carefully. If a color deviates only slightly, the result is often disappointing. The new RPA455 Mettler Scale is now available for order, it comes with a multi-colour touchscreen and is connected and powered by a USB cable. Mix the right colour time and time again.

Mettler Toledo scale

ARTICLE NUMBER	DESCRIPTION
66-0090	Standard Scale USB Connected
66-0091	Atex zone -1 Scale USB Connected
66-0092	Atex zone -2 Scale USB Connected

Supporting products

ARTICLE NUMBER	DESCRIPTION	PER BOX
66-0094	Display Protection Covers	10
66-0095	Column Protection Covers	10
66-0096	Base Protection Covers	10
66-0097	Cable & Data Non-Ex 3m	1
66-0098	USB Cable & Data zone-2, 3m (spare part)	1
66-0099	Power Only Standard USB Scale (Multi-plug)	1

Protection
Protective covers for the display, column and weighing platter, enable easy cleaning of the scale, protecting your investment.

Easy installation
The RPA455 is equipped with a uniquely hidden routed channel that protects the power and communication cable from damage. Making installation and daily use easy and safe.

Touchscreen
Two strategically located Zero/Tare buttons enable easy operation for right or left-handed operators, reducing the possibility of blocking the screen during the mix process.

COLOUR SUPPORT
ALWAYS, ANYWHERE

Colour Support Form

The Colour Support Form (CSF) is a high-speed service for our partners. They can place questions to our colour experts online. And because we have operations across the globe, the questions are always answered quickly. This gives refinishers the speed and flexibility they require.

NB: If you can't find the right colour match despite all the colour tools, we will send you the right formula within 48 hours of receiving a colour sample!

Colour training courses

To enhance your colour matching expertise and improve your techniques and productivity, try one of our professional training courses. A colour training course will provide you with all the know-how and skills you need to make the perfect colour matches. It goes without saying that colour tools such as the Tinting Selection Guide and the spectrophotometer form an important part of the training courses. The courses can be done in-company or at one of our Business & Technical Centres.

Panels

To decide on colour formulas, we use original car panels. Car panels donated from around the world help us perfect our colour information. Our global color technology lab processes the colours of original car panels (up to five years' old) into acolour formula.
